GIOVAN AARON

Full-Stack Software Engineer | AI Products, APIs & Cloud-Native Applications | PSM I Certified
London, UK | +44 7828 646456 | Email | LinkedIn | GitHub | Website

PROFILE

Full-Stack Software Engineer focused on AI-enabled and data-driven products, combining Python, React and TypeScript experience to deliver secure APIs, polished interfaces and end-to-end features. At FlowFree, contributed to an AI/NLP-enabled mental wellness SaaS MVP, including sentiment analysis and moderation workflows. Invited to speak at NIHR and NHS England sponsored event concerning trustworthy AI-powered health services and patient-centred digital experiences. Experienced in agile collaboration, testing and cloud-native delivery.

CORE SKILLS

Languages: TypeScript, JavaScript, Python, SQL
Front End: React, React Native, Next.js, Vue.js, HTML, CSS, accessible UI, design systems
Back End: Node.js, Express, FastAPI, Flask, Django, REST APIs, WebSockets, Socket.IO
Data & Cloud: PostgreSQL, MongoDB, Redis, AWS S3, AWS Lambda, Azure OAuth, Docker
Testing & Delivery: Jest, Supertest, unit testing, integration testing, Swagger, CI/CD principles
Product & Agile: Figma, user research, wireframing, KPI planning, risk management, stakeholder management, Scrum

EXPERIENCE

Product Engineer – Contract **11/2025 - Present**

- Currently developing a CRM workflow automation service for a lampsychiatry.com, focused on reducing patient abandonment risk across appointments, prescriptions, payments, reports, and follow-ups. Gmail/Google Workspace mailbox integration, domain email routing, status-triggered communication flows, and risk-based migration

For an independent creative media brand:

Built and implemented custom analytics and tracking systems, contributing to 13,277 monthly sessions, 3,000% month-on-month growth, and improved funnel visibility.

Developed and maintained website components to support marketing campaigns and user acquisition.

Designed data-driven experiments to improve conversion rates across landing pages and signup flows.

Analysed user behaviour data from Wix, TikTok traffic, and campaign analytics to inform product and UX decisions

Full Stack Software Developer | Rendesco | Clean Energy & Sustainability **05/2025 - 07/2025**

- Collaborated with technology and product leadership on a B2C Home Energy Management System using React Native, FastAPI and supporting web infrastructure.
- Designed an interactive home energy UI in Figma and SVG, visualising real-time solar, EV and heat pump data for consumer decision-making.
- Set up Grafana dashboards for equipment monitoring and customer analytics, giving internal stakeholders access to live operational insights.
- Implemented Azure OAuth authentication, secure account workflows and onboarding flows for B2C users.
- Containerised microservices with Docker and documented APIs with Swagger, using PostgreSQL and Pydantic for robust data validation.

Tech: React Native, FastAPI, Figma, SVG, Grafana, Azure OAuth, Docker, Swagger, PostgreSQL, Pydantic

Software Developer | FlowFree (Unify Giving Subsidiary) / *Health & Wellbeing SaaS* **11/2024 - 04/2025**

- Contributed to the MVP of an anonymous mental wellness SaaS platform connecting employees with trained peer supporters through secure real-time chat and feedback flows.
- Built privacy-first chat functionality using React, WebSockets and Socket.IO to support safe anonymous peer support at scale.
- Developed a sentiment analysis microservice with FastAPI and Hugging Face, triggering live moderation feedback during support sessions.
- Designed accessible onboarding, chat and feedback UIs with a focus on psychological safety and low-friction support access.
- Implemented GDPR-aware MongoDB schemas, no persistent IDs, secure REST APIs and auto-deletion patterns for sensitive user interactions.

- Built NLP-based escalation logic, soft warnings and alerts for risky conversations; containerised services and wrote unit and integration tests.

Tech: React, Node.js, Express, Socket.IO, MongoDB, FastAPI, Hugging Face, Docker, JWT, GDPR

Product Developer | TechReturners / *Contract* **12/2024 - 02/2025**

- Developed a proof-of-concept event management application using React, JWT and PostgreSQL, including Google Calendar API integration.
- Delivered a secure MVP with role-based access and Netlify deployment for rapid stakeholder testing and feedback cycles.

Tech: React, JWT, PostgreSQL, Google Calendar API, Netlify

Software Developer | Unify Giving / *Paytech* **10/2023 - 11/2024**

- Improved API performance by 60% through pagination, indexing, selective field fetching and Redis caching for frequent endpoints.
- Launched Stripe donations with PCI-compliant flows, payment intent verification, webhooks and real-time confirmation across the mobile platform.
- Designed and implemented REST APIs with Node.js, Express and Prisma ORM, interfacing with PostgreSQL and supporting mobile app features.
- Strengthened React Native app performance and UX by refactoring Redux logic, improving navigation, gesture handling and visual consistency.
- Improved developer velocity through reusable components, Swagger API documentation and stronger automated test coverage.
- Secured platform workflows with JWT, Google OAuth, RBAC and Bcrypt password hashing.

Tech: Node.js, Express, React Native, TypeScript, Redux, React Query, PostgreSQL, Prisma, AWS S3, Stripe, JWT, Docker, Jest

Trainee Software Developer | Northcoders **02/2023 - 05/2023**

- Completed intensive software development training after exploring technical career paths through UX design and agile delivery certifications.

ADDITIONAL EXPERIENCE

IT Project Manager | University College London **09/2021 - 08/2022**

- Managed cloud migration and large-scale upgrade projects involving 12+ system integrations, ensuring delivery against tight timelines.
- Led SAFe implementation activities including PI Planning, Inspect and Adapt workshops, Scrum of Scrums and PO Sync.
- Built roadmaps, managed dependencies, removed impediments and drove domain-wide collaboration across product and technical teams.
- Partnered with product ownership to translate business requirements into clear user stories and prioritised backlogs.

PRODUCT PORTFOLIO

Don’t Touch My Gum! | Desktop Mini-game / *Front End & UI Design*

- Released an indie desktop mini-game via itch.io, attracting 100+ users within the first month and peaking at 44 concurrent users in a single day.
- Featured in the Pygame WebAssembly Collection; designed gameplay and visual assets using Figma, Procreate and Ableton.

Tech: Python, PyGame, Figma, Procreate, Ableton
